

First Responders Foundation

Resiliency / Mental Health Wellness Training

Resiliency training enables participants to learn how to expend, recover, heal, and replenish their resiliency to maintain healthier lives and careers. The mental health wellness portion will help provide awareness and skills to help with the mental health challenges of the job. This is critical training for all first responders, whether they are just beginning their careers or have been in the trenches for several years. This is a 3-hour training session.

**December 5, 2022
8:30AM - 11:30AM
